

TECHNICAL SPECIFICATION

DEEP CLEANER FOR LEATHER

Deep Cleaner for Leather is specifically formulated to leave leather looking and feeling new without harming the topcoat. It removes challenging stains like soda, ketchup, mustard, body oils, gum—and yes—nail polish. The deep cleaning leather formula lifts soils and stains from finished leather, including removing the worn gloss that leather acquires with age.

Can be used both on natural leather and synthetic faux leather. Also great on vinyl, rubber, synthetic surfaces and thermoplastics such as arm caps, seat frame, overhead bins, decorative laminates, etc.

CERTIFICATION Boeing D6-7127
